TRANSFORMING OUR WORLD

Pulsar II
Compact Blast Cabinet

This high quality brand belongs to the product group "blast cabinets". Clemco's blast cabinets are suitable for the processing of small to medium sized workpieces. The environmentally-friendly blasting within a cabinet ensures high efficiency and safe work conditions.

Pulsar II Compact Blast Cabinet
The Pulsar II is the smallest compact cabinet of our product range. Despite its small size, the cabinet provides everything that is necessary for an efficient blast process and offers every advantage like our larger compact design cabinets. Furthermore, the Pulsar II comes with a height adjustment allowing sit or stand in front operation.

Depending on your needs, the cabinets can be ordered as pressure- or suction system.

Area of application	smaller blast processes cleaning, deburring refining, roughening
Total dimension: W x H x D *	1200 x 1550-1870 x 1420 mm
Weight *	350 kg
